PROFILE

Motivated Computer Science student at COMSATS University Islamabad (Attock Campus) with hands-on experience in full-stack web development, database design, and mobile app development. Currently interning as a Software & AI Intern at ClickTake Technologies. Completed a prior technical internship at PAC Kamra.

INTERNSHIP EXPERIENCE

Software & AI Intern (Full-Stack Web Development) — ClickTake Technologies June 2025 –

Present · Remote

- Building a full-stack admin panel for a UK- and Pakistan-based digital agency (AI/ML, web development, digital marketing, creative services)
- Developing React + TypeScript + Supabase dashboard with CMS, Lead/CRM, Email, RBAC, SEO, and Settings modules
- Implementing Supabase PostgreSQL schema, RLS policies, and service layer; collaborating remotely within a professional team

Software / IT Intern — Pakistan Aeronautical Complex (PAC), Kamra July – August 2025

- Worked within the technology division of a national-level aircraft manufacturing facility
- Gained exposure to industrial-scale IT infrastructure, professional systems, and workplace standards

EDUCATION

BS Computer Science COMSATS University Islamabad, Attock Campus | 2023 – Present | Currently in 7th Semester

Secondary & Higher Secondary Education Daanish School, Jand | 2016 – 2023

TECHNICAL SKILLS

Programming Languages: Python, Java, C/C++, JavaScript

Web Development: HTML, CSS, JavaScript, Bootstrap, React, TypeScript, Tailwind CSS

Mobile Development: React Native / Expo, Flutter (In Progress)

Database: MySQL, SQL, MongoDB, Supabase (PostgreSQL), Firebase Firestore, Mongoose ODM

Backend: Node.js, Express, REST APIs, JWT Authentication, Supabase Edge Functions

Tools & Platforms: GitHub, VS Code, Git, Expo, Supabase, Firebase, Vite, TanStack Router

PROJECTS

RepoGrok Tech: Next.js 15, Groq AI (Llama 3.3 70B), Supabase, Prisma, Tailwind CSS v4, React Flow

AI-powered GitHub repository analyzer — paste any repo URL and get instant code summaries, tech stack detection, architecture diagrams, setup guides, and project ratings.

- Built AI analysis pipeline using Groq (Llama 3.3 70B) to generate summaries, detect tech stacks with category labels, and produce per-directory explanations
- Implemented interactive folder tree browser, React Flow architecture diagram with node-graph visualization, and 7-dimension project rating system
- Added PDF/PNG/SVG export for architecture diagrams; persisted analysis history to Supabase PostgreSQL via Prisma

CodePilot AI Tech: React, TypeScript, Vite, Tailwind CSS, Supabase, PostgreSQL

Automated code analysis platform with real-time scanning, team collaboration, and AI-powered fix recommendations.

- Built 11+ scanners for code quality, security, performance, and architecture issues with AI root cause analysis
- Passcode-based team isolation with RBAC; live dashboards via Supabase Realtime; ZIP upload and GitHub URL fetch support
- Designed full PostgreSQL schema, RLS policies, and Supabase Edge Function for SMTP2GO email invites

ClickTake Technologies — Company Website & Admin Panel *Tech: React 19, TypeScript, Vite, TanStack Router, Tailwind CSS, Supabase*

Group project (2 people) — Full-stack company website paired with a complete admin panel for a UK/Pakistan digital agency.

- Built company marketing frontend: services showcase, portfolio, and contact form with lead capture
- Developed admin panel with lead management, content editing, SEO settings, and role-based user management — all connected to Supabase

Autism Buddy — AI-Powered ASD Screening App *Tech: Flutter, Firebase, Firestore, Python (Flask), scikit-learn*

Group FYP project (In Progress) — AI-powered mobile app for ASD awareness screening and developmental support.

- Building Flutter mobile app: auth flows, multi-child profiles, 20-question behavioral screening calling Python ML API, and risk result display with non-diagnostic disclaimers
- Implementing emotion-matching activities, routine sequencing modules, dashboard with history charts, and therapist booking via Firestore atomic transactions

Smart Campus Canteen App *Tech: React Native (Expo), Node.js, Express, MongoDB Atlas, Firebase, JWT*

Cross-platform mobile app replacing cash-based canteen operations with cashless food pre-ordering.

- Student flow: OTP-verified registration, live menu with stock validation, digital wallet checkout, real-time order tracking (pending → preparing → ready → completed)
- Admin console: menu CRUD with image uploads, live order queue, automatic refunds; JWT auth, bcrypt, Zod validation, and role-based middleware
